Wholesale Trade List

FALL 1955

SPRING 1956

OUR GUARANTEE

All items are guaranteed to be true to name and of the size and age indicated. We have been growers of lining out stock now for 90 years and consider our host of old and new customers our greatest asset. We always strive to please and do not consider any deal complete until our customer is satisfied in every respect.

TERMS

Cash in full with order earns 3% discount. Boxing and baling will be charged for at actual cost only. Cash customers will be billed for boxing after shipment.

TO ESTABLISHED CREDIT, 2%-10 days from date of invoice. All accounts due 1st of second month following date of invoice.

RATES

5 of same size and variety earns 10 rates, 25 of same size and variety earns 100 rates, 250 of same size and variety earns 1000 rates.

SEEDLINGS

indicated by age, and the word sdls. following. For instance, 2 yr. sdls. indicates seedlings two years old and not transplanted.

TRANSPLANTS

are indicated with an "X" after the item, and each additional X means an additional transplanting, such as XX indicates the item is twice transplanted.

BIRDS EYE VIEW OF THE NURSERY

Evergreen Nursery Co.

Lining Out Stock

Explanation - Please Note

After each item 2 or 3 yr. sdlg. indicates the age of the tree and "sdlgs." indicates seedlings, such as 1 yr. sdlg. means one year seedlings, 2 yr. sdlg. indicates 2 year seedling. Each "X" after an item denotes the item is transplanted, such as X is once transplanted, XX twice transplanted.

UNDERSTOCKS

Our understocks are all very carefully graded to a straight stem calipering 3/16 to 1/4 inch. We are proud of our understocks and their quality make possible better stands of grafts for you.

Juniperus Virginiana	10.00	95.00
Norway Spruce	10.00	95.00
Am. Arbor Vitae	9.00	85.00
Scotch Pine	9.00	85.00

All once transplanted

Specimen Evergreens

Write us for special quotations. Space does not permit us to list them in this bulletin. We grow a nice assortment.

FERNS

Also known as Ostrich Plume fern. One of the best of the hardy fern. Perennial. Ideal for shady spots and secluded nooks. Our roots are all No. 1 grade, - large and husky. Make an excellent over the counter winter item to sell, as many people pot them and plant inside.

No. 1 Roots \$10.00 C \$95.00 M

FALL PLANTING

There has been a lot of pros and cons in recent years on fall planting. Some growers swear by it and others will have nothing to do with it. We have done a lot of experimental planting in the fall and in recent years have done considerably more of it and this year we are planning to do the major portion of our lining out in the fall.

We have observed a few things, and are glad to pass on our experience. First of all, it has been our observation that any of the Spruce, Pine and Fir family transplant very well, even as early as the later part of August and certainly the fore part of September. These varieties mature very early, and by planting them the later part of August or the early part of September, you give them an opportunity to make considerable root growth before freeze-up. Immediately following planting, we give them a thorough soaking regardless of the weather. This gives the soil a chance to become firmly compacted and is conducive to an early and prompt root growth. Then during the fall, if we should have dry weather, it is well to water them occasionally. Also, shortly after planting we sometimes scatter oats in the block and cultivate it lightly to cover the oats up as much as possible. This will grow and offer an excellent ground cover for the trees in event we have an open winter, and would prevent to quite an extent heaving in event there is lot of intermittent freezing and thawing. If you don't do this be sure to mulch them with coarse straw, evergreen brush or marsh hay. Do not use leaves, fine straw, or any material that will compact too tightly and do not cover until either the ground freezes or cold weather arrives. On varieties such as Arbor Vitae, and Junipers, we would suggest that they not be planted until the later part of September but otherwise the procedure is the same for we have found that these grow a little later in the season than do the Spruce, Pine and Fir family.

There is no question, but what fall planted trees start growing much earlier in the spring and make a larger growth the first year than do spring planted trees and we also know that over a period of years, one will have as good or better stands of fall planted stock than you will spring, because there is just as much danger of loss from a hot dry summer following a late spring planting than there is danger of injury due to an adverse winter following fall planting.

If properly done and properly handled, we are very enthusiastic about fall planting.

CHRISTMAS TREES

Approximately 35 million Christmas trees are used in this country annually, and the growing of them in commercial plantations is getting to be a very lucrative business. Good planting stock is imperative for success. We grow large quantities of transplants for this very purpose and can supply quality trees at reasonable prices. Plant a few acres every year and you will soon have a nice annual income. We would be happy to advise you on soil, cultural practices, etc.

Douglas Fir

4 yr. trans. 4-8 in.	8.00	75.00
----------------------	------	-------

Norway Spruce

4 yr. trans. 5-10 in.	7.50	70.00
-----------------------	------	-------

Scotch Pine

4 yr. trans. 6-14 in.	9.00	85.00
-----------------------	------	-------

Norway Pine

4 yr. trans. 6-10 in.	10.00	95.00
-----------------------	-------	-------

The above are the most used varieties, altho Balsam Fir, White Spruce, and other varieties of Pine are also used in some localities. If you are interested write for special quotations.

PLANT NOW FOR A STEADY INCOME LATER

CONTRACT GROWING

With the event of large reforestration, soil conservation and Christmas tree projects small evergreens are being used in large quantities for these purposes. We now have all our operations completely mechanized and are in a position to grow any quantity of evergreens to suit your specific requirements at astonishing savings. Write for more information.
